FOR IMMEDIATE RELEASE

**Date: 4.14.2020**

The Tippecanoe County Health Department posted Directives for Essential Businesses along with an Order from the Tippecanoe County Health Officer postponing or cancelling community events through June 30. Both documents are intended to be used by individuals/organizations who are planning for large community events, greater than 10 persons, to begin considering either to postpone or cancel such gatherings through June 30. Due to the amount of planning, entering of contracts etc. for such gatherings, conversations should be taking place on what other options are available.

If at any time Governor Holcomb cancels the Stay at Home Order prior to this date, then the June 30 date would become null and void and would automatically coincide with the Governor's end date of this order.
